SUMMARY

3rd-year B.Tech student specializing in AI with hands-on experience building distributed systems, full-stack web applications, and C++ engines. Skilled in Node.js, React, Docker, and PostgreSQL. Seeking SDE internship opportunities to apply backend and systems knowledge in a production environment.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence)	2023–2027
KIET Group of Institutions	CGPA: 8.22
Intermediate Schooling	2021–2022
Aligarh Muslim University	Percentage: 93.5
High School	2019–2020
Aligarh Muslim University	Percentage: 97.8

TECHNICAL PROJECTS

ChronoQueue – Distributed Video Processing Platform

Feb 2026 – May 2026

Distributed task queue system for asynchronous video processing using microservices architecture.

- Built a scalable video processing platform using Node.js, Redis, Upstash, PostgreSQL, Supabase, and Docker, supporting asynchronous execution across 3+ concurrent worker services.
- Designed a Redis-backed distributed task queue with retry mechanisms, dead-letter handling, and real-time job tracking, achieving 99%+ successful job processing reliability under concurrent workloads.
- Containerized microservices with Docker and implemented horizontally scalable worker architecture, enabling 5× higher concurrent job throughput without architectural changes.

ResumeMatcher – AI Resume Matching System

Oct 2025 – Jan 2026

C++-based resume screening system for automated candidate-job matching and ranking.

- Developed a resume matching engine in C++ using object-oriented design and STL data structures to evaluate candidates across 10+ skill categories with weighted scoring logic.
- Implemented keyword extraction, skill mapping, and ranking algorithms to automate candidate screening, reducing manual filtering effort by an estimated 60%.
- Built a modular REST API service using Crow and CMake with structured file parsing support, enabling scalable integration with frontend applications and external job datasets.

Scoops – Full-Stack Ice Cream E-Commerce Platform

Dec 2024 – Apr 2025

Full-stack web application with user authentication, session management, and real-time table reservation.

- Developed a responsive frontend using React, TypeScript, TailwindCSS, and Framer Motion with reusable component architecture.
- Implemented authentication workflows, REST API integration, and Redis-backed persistent cart synchronization.
- Optimized performance and responsive design for seamless user experience across desktop, tablet, and mobile devices.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, SQL, Python
Frontend: React.js, HTML5, CSS3, TailwindCSS, Framer Motion
Backend: Node.js, Express.js, REST APIs
Databases: PostgreSQL, MySQL, Redis
Core Concepts: Data Structures & Algorithms, OOPS, DBMS, System Design, Microservices, Distributed Systems
Tools: Git, GitHub, Docker, Linux, CI/CD, VS Code, Postman

CERTIFICATIONS

Palo Alto Networks Certified Network Security Administrator (PCNSA) Palo Alto Networks, 2024

AWS Certified Cloud Practitioner  [View Certificate](#) Amazon Web Services, 2025

POSITION OF RESPONSIBILITY

Core Member – Vpaksh (KIET Dramatics Society) 2023–Present

- Led team coordination across 10+ member performances, winning EPOQUE and Prastuti events (2023).
- Secured 1st Prize in Skit and Nukkad Natak at IIT Jodhpur and IIT Roorkee.
- Attracted 300+ viewers per event across 5+ performances; raised over Rs. 20,000 through prize winnings.
